UniBox is an intelligent access controller combined with comprehensive billing and bandwidth management solution. UniBox allows network administrators centrally manage wired and wireless networks, avoid unauthorized access and track real-time activity on the network.

Finetune UniBox U-5050 is an all-in-one controller appliance that combines the functions of a wireless LAN controller, hotspot gateway, AAA server, web server, load balancer, web logger, VPN server, policy server and firewall in a single box. It also comes with a comprehensive reporting and analytics tools for analyzing and tracking network activity of all users. UniBox can be deployed as a standalone appliance or can function with WiOS OSS/BSS. The **Finetune UniBox U-5050** is part of the UniBox family of high-performance network access controllers, purpose-built for large and demanding environments such as airports, premium hotels, educational campuses, and public hotspots. Engineered on a robust Linux platform, the U-5050 supports **500 concurrent active sessions** and is **scalable up to 10,000 users**, ensuring high availability, reliability, and seamless performance.

The integrated AAA engine supports **BYOD onboarding with self-service authorization** and enables **certificate-based machine authentication** for non-Active Directory mobile devices such as tablets and iPads, ensuring secure and flexible access control across diverse device types
